**Abstract**—Our working group on the meticulous use of Turkish Informatics terms is a working group of the Informatics Association of Turkey. The aims of our working group are clarified as: To clean the Turkish informatics terms from defective terms; to develop a dictionary to offer proper Turkish equivalents to especially contemporary informatics terms; to be a role model to other domains in the cleaning of Turkish from defective use; and to promote awareness of the value of meticulous Turkish in lieu of defective Turkish. After a brief review of the goals of language planning, our rationale and activities are presented and our future activities are outlined.

**Keywords**—*language planning, meticulous use of Turkish informatics terms, defective use of Turkish, dictionary of Turkish terms of contemporary informatics, Informatics Association of Turkey*
